VOLUNTEER EXPERIENCE

IEEE SUSTECH Web Community Leader (March 01, 2022 - Present)

A Software engineer with 4 years of experience in the field. I got my hands on many technologies until he was able to see the similarities in the programming languages and the systems architectures. I have a bigger picture of software development with 3 years of experience on both Laravel and Flutter developing more than 15 apps and 10 web apps. I consider myself Committed, responsible, and a hard worker.

WORK EXPERIENCE

WebOrigo (May 31, 2021 - Present)
Full Stack Developer

- Contributed to building in-house software containing individual sub-systems was helping manage the company.
- Built solid and reusable UI components to be used across multiple in-house systems that helped speed up the development.
- Built an in-house Bonus system, allowing the company to provide employees with a monthly bonus of up to 30% which improved employees' productivity. [reference](#).

Alhostis co. (June 30, 2018 - May 31, 2020)
Full Stack & Mobile Developer

Here I learned most of my backend development experience, working with PHP/Laravel. Building, with Flutter and other technologies, small and medium size apps and scalable web systems such as:

- Wain Price Comparison Platform:** (Laravel, AlpineJS, Livewire, flutter) A Sudanese electronic platform that provides up-to-date data on the prices of goods and services from various suppliers in one place.
- Taseti Media Network:** (ionic, typescript, angular, PHP, MySQL) Taseti Media Network is one of the pioneers in Sudan, with a number of Sudanese channels, forming a comprehensive package that includes a number of TV channels, radio, and social media platforms.

EDUCATION

Software Engineering (October 31, 2017 - Present)
Bachelor's Last Year

This long period of study is due to the inconsistent semesters, caused by the unstable state of the country.
